**Threaded Fitting**

**Quick Disconnect Fitting**

If you have the threaded style fittings, the radiator is ready for installation.

If you have the Quick Disconnect style fittings, then you MUST use the new fittings provided. (Pictured)

**NOTE: A special tool is required to remove transmission lines from Quick Disconnect Fittings. This tool is available at: [www.BulletProofDiesel.com](http://www.BulletProofDiesel.com)  
Keyword Search: Tool**

1. Remove only one fitting from the radiator. **DO NOT REMOVE MORE THAN ONE AT A TIME.**
2. Install the provided Quick Disconnect Fitting. **DO NOT OVER TIGHTEN** as damage to the radiator could result.
3. Repeat steps above on second fitting.
